

Submission: Barber Appointment Booking App (MVP)

Applicant Name: Hussain Hamim

Position Applied: React Native Intern Role

Project Type: Assessment Task

Email: mohammadhussainafghan83@gmail.com

Project Overview

This project is a **Barber Appointment Booking App** built using **React Native and Expo**. It fulfills all the MVP requirements specified in the task and includes some bonus features for a better user experience. The application allows users to browse barbers, view their services, and book appointments easily.

✅ Features Implemented

Core Functionality

- **Barbers List (Home Screen)**
- **Services Screen**
- **Booking Screen**

Bonus Features

- ✅ **Favorites toggle** for barbers (stored in AsyncStorage).
 - ✅ **Local booking history** using AsyncStorage.
 - ✅ **Appointment summary screen**.
 - ✅ Clean and responsive UI using StyleSheet.
 - ✅ Developed with **TypeScript** for type safety and clarity.
-

- **Demo Video (YouTube):** [Click to watch](#)

- App Download Link: [Click to download](#)
-

Technologies Used

- React Native (Expo)
 - Expo router
 - TypeScript
 - AsyncStorage
 - Local static JSON for data
-

Final Notes

All the features were implemented and tested. I've focused on clean UI, modular components, and smooth navigation. This submission reflects my ability to deliver independently and align with React Native best practices.

Thank you for the opportunity!
Looking forward to your feedback.
